

Do not expect too much!
Expect a lot more!
Exclusively for you!

Here are the most striking reasons for wanting your own personal awning colour.

colour **on demand** – awning fabric colour to order. 1,625 colours. Unbelievable but true.

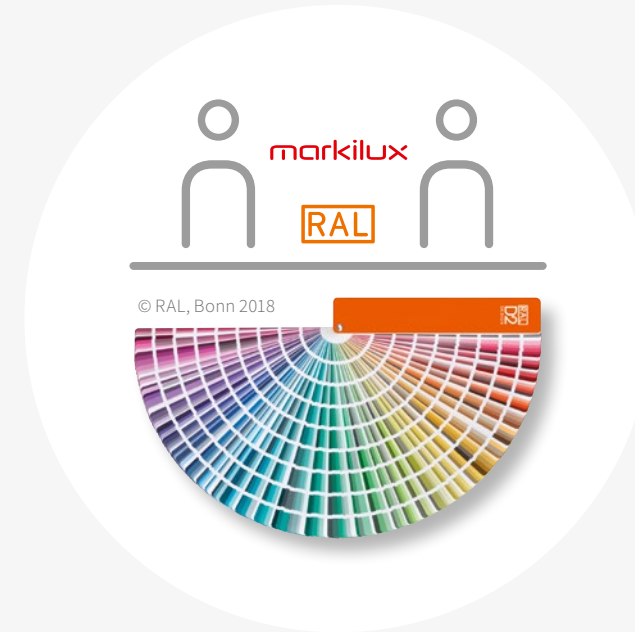

Colour is an expression of personality. With the new colour **on demand** system, markilux gives you the opportunity to choose your very own colour to create your own personal awning heaven. The basis is a plain white fabric in the tried-and-tested markilux sunvas quality, dyed using a state-of-the-art and extremely fade-resistant dyeing process.

Testing of the material by independent bodies has provided undeniable proof of the excellent technical characteristics of the quality of sunvas fabric.

markilux – the best under the sun.
And the most beautiful shade in the world.

1

It's this simple:
Choose your own personal fabric colour in the showroom of your markilux specialist dealer.

3

Simply enjoy the use of your personalised awning at home.

We do not want to show off ... unless, of course, you insist!

markilux' expertise with colour derives from our decades of experience, meaning that markilux now relies on its own development of an extremely fade-resistant yarn-dyeing process. The dye penetrates the high-tech yarn entirely – a cross section provides proof.

With colour **on demand**, markilux offers you an almost unlimited choice of colours to create your own personal awning. Exclusively!

2

Order the awning fabric in your preferred colour.

colour **on demand**
1,625 good reasons to show your true colour.

Colour is an expression of personality. With the new colour **on demand** system, markilux offers you – in cooperation with RAL – the opportunity to design your own personal awning heaven in the colour you have always dreamed of.

1,625 colours. Infinite possibilities.
Unique in Germany. Unique in the world.

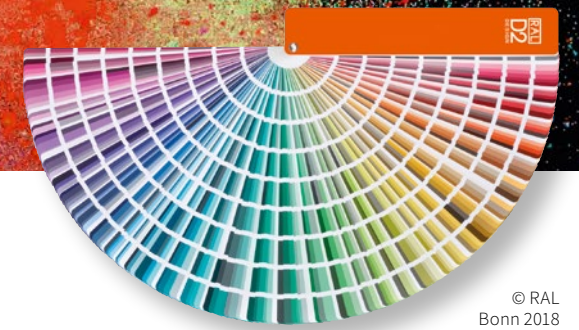

Please note that the colour sample of your own personal favourite colour is depicted as if you were looking at the awning cover from the same side as the light source illuminating it. Your perception of the colour when the light source is behind the fabric will alter correspondingly.

A realistic impression of what the fabric will look like can be attained by using the original RAL colour swatches that you can find in the showroom of your markilux specialist dealer. However, because of the different materials used (textile and paper), slight variations in colour between the actual fabric and the RAL colour swatch cannot be avoided.
